ARTIST RECEPTION & TALK

Mexico 1953

PHOTOGRAPHS BY ROGER HAGAN

In 1953, at age 19, Californian Roger Hagan bought a used Rolleiflex and drove off with a friend to photograph Mexico, his first visit abroad. He returned a second time at the end of the 1950s. Photographs from these two trips, never printed until the 21st century, will be on display at the library in September. Because of the rich Mexican heritage found in the valley, Hagan has offered this exhibit to the St. Helena Public Library. Refreshments will be served. Following the reception, Hagan will discuss what the photographs now mean to him.

Hagan's Mexico was, in his own words, "beautiful, mysterious, and touching." His photographs demonstrate what a very young American found memorable and beautiful about a poor but hopeful nation, just a generation out of its revolution. In addition to the exhibit, Hagan's book of photographs "Mexico 1953" will be available for checkout through the library.

In a four-part lecture series this fall, Jay Greene will describe the major events of the period and explore answers to the “explosive” question we all want answered: How did we avoid entering a Hot War with the inevitable exchange of nuclear weapons that could have resulted in a radioactive return to the Dark Ages? Jay Greene is a respected historian and lecturer who lives in St. Helena.
