

smart yard[®]

save blue ≈ make green

The City of St. Helena is introducing Smart Yard to provide its customers with a highly effective program to use water more efficiently.

St. Helena is focusing on landscapes because nearly 60% of our region's water supply is used outside. Most landscapes, even those with low-water-use plants, are overwatered by 30% to 300%, according to water agency studies.

By helping homeowners and businesses conserve water and reduce their water bills, **everyone wins.**

Why use more water than you need to?

Save time, money and water with Smart Yard. Protect the health of your landscape and local water supply. WeatherTRAK Smart Water Management Solutions automate irrigation schedules to deliver the right amount of water at the right time.

Your Residential* Smart Yard Package includes:

- WeatherTRAK Smart Irrigation Controller
- Site Qualification and Installation Appointment
- Follow-up Site Visit and Evaluation
- Free Online Training with WeatherTRAK Instructor
- Bilingual Customer Support, Mondays-Saturdays
- 5 year subscription for Wireless Daily ET Weather Service
- No up-front costs to participate
- Affordable monthly program fee, financed by City on water bill

** Commercial Programs Are Also Available*
